The PearlMini is the latest over counter development with a stylish flexible design in the water sector. Designed to be operated as a standard over counter cooler, it also offers the possibility to separate the tower from the cooler by mounting the dispensing tower on a stable surface at the serving location and installing the cooling unit underneath. This gives a whole new character to the PearlMini while retaining its stylish and classy charm.

The unit provides still water, medium carbonated- and carbonated water in a hygienic and excellent tasting water quality. Through its low noise level, the PearlMini is suitable for operating in offices or waiting areas.
