Features

Marketing Campaigns
Create daypart playlists on the unit to ensure your message is always relevant

High Quality
High resolution, dual touch screen includes a quality assembly and robust, commercial-grade components – longer screen life with less risk of scratching.

Easy Retrofit
This backwards compatible kit allows you to update your current fleet of equipment with a single harness connection from machine to screen.

Digital Flavor Cards
Easily swap out flavor cards in the field via our digital library

Digital Broadcasting
Broadcast your campaigns with greater sales impact than traditional, static options.

Ease of Service
Ability to view and control the status, setup and maintenance screens on the larger, easier to use digital screen.

Drink Trend Data
See what flavors are performing on the unit with interactive graphs

DMS Services Ready
Ability to add on the DMS suite of services for remote notifications, reporting and content deployment.
